J Vasanth Marshal

Senior Software Engineer | Full Stack Developer | GenAI Engineer
LinkedIn Profile

Location: Chennai, Tamil Nadu
Email: vasanthmarshal2020@gmail.com
Mobile: 7397106325

Professional Summary

Senior Software Engineer with 2.5+ years of experience building enterprise-scale full-stack applications using Node.js, Vue.js, React.js, PostgreSQL, Redis, and AWS. Experienced in designing scalable backend systems, integrating enterprise platforms, and developing production-ready applications. **Claude Certified Architect – Foundations (CCAR-F) and Claude Certified Developer – Foundations (CCDV-F)**, with hands-on experience in Claude Code, Model Context Protocol (MCP), Prompt Engineering, Context Engineering, AI Agents, Skills, Hooks, and reusable AI development workflows. Focused on applying Generative AI to software engineering, developer productivity, workflow automation, and delivery.

Education

SASTRA Deemed University — Thanjavur, Tamil Nadu
B.Tech in Computer Science and Engineering (CGPA: 8.58) — *Oct 2020– May 2024*

Technical Skills

Languages	:	JavaScript, TypeScript, C++
Frontend	:	React.js, Vue.js, Next.js, Redux, Redux-Saga, Storybook, Shadcn UI, Tailwind CSS, HTML, CSS
Backend	:	Node.js, Express.js, REST APIs, JWT Authentication
AI Engineering	:	Claude Code, Cursor, GitHub Copilot, Prompt Engineering, Context Engineering, Model Context Protocol (MCP), MCP Inspector, AI-assisted Software Development
AI Coding Workflows	:	CLAUDE.md, Cursor Rules, Skills, Hooks, Commands, AI Agents
Databases	:	PostgreSQL, MySQL, MongoDB
Cloud	:	AWS, Docker
Caching	:	Redis
Testing	:	Jest, Vitest, React Testing Library
Monitoring	:	New Relic
CMS	:	Contentful
Collaboration	:	Git, GitHub, Bitbucket, Jira, Slack
Tools & Platforms	:	DocuSign, Adobe Acrobat, Acquia DXP, Braze

Experience

Bounteous x Accolite (Feb 2024 – Present) — Global Infocity Park, Chennai

Software Developer Intern (Feb 2024 – Sep 2024) → **Software Analyst** (Oct 2024 – Jun 2025) → **Senior Software Engineer** (Jul 2025 – Present)

- Contributed to the development and delivery of enterprise-grade full-stack web applications across multiple client engagements.
- Leveraged Claude Code, Cursor, and GitHub Copilot to accelerate feature development, debugging, refactoring, and documentation by designing reusable AI development workflows with CLAUDE.md, Skills, Commands, Hooks, Rules, AI Agents, and MCP integrations, improving developer productivity and engineering consistency.
- Built an AI-powered release verification agent using Jira, GitHub, and Slack MCP integrations to cross-check repository branches against sprint tickets, identify mismatches between planned and implemented work, and automate release reports, reducing manual errors and saving approximately half a day of developer effort per release.
- Built an MCP server with database access tools, enabling Claude to data through tool calls and analyze issues to accelerate debugging and root cause analysis.
- Engineered an internal PostgreSQL snapshot and restoration tool for transaction-specific test data, reducing developer and QA testing time by 30% while accelerating debugging and issue reproduction.
- Integrated enterprise platforms including JPMorgan Chase, Braze, Contentful, Acertus, RunBuggy, and Slack APIs, Provider Exchange Network.
- Worked with AWS services including S3, SQS, SNS, SES, Lambda, ElastiCache, and AWS Secrets Manager.
- Improved application performance using Redis caching, Single Flight Pattern, optimized database queries, and API performance enhancements.

Projects

End-to-End Vehicle Purchase Digital Checkout Platform *Feb 2025 – Present*

- Contributed to the development of a digital vehicle purchase platform that streamlines private-party vehicle transactions, including payments, financing, title transfers, document signing, and delivery workflows.
- Created Engineering Requirements Documents (ERDs) for multiple features and drove end-to-end feature development from requirements gathering through implementation and delivery.
- Delivered and maintained production-ready full-stack features using Node.js, Vue.js, PostgreSQL, Redis, and AWS.
- Implemented Braze integrations to automate customer email and SMS communications and developed reusable campaign POCs, reducing campaign creation and maintenance effort by 90%
- Implemented the Single Flight pattern to coalesce up to 100 concurrent requests, eliminating redundant function and database calls and improving API response latency.
- Engineered REST APIs, webhooks, and third-party services to automate business workflows and enhance platform capabilities.
- Leveraged Redis caching and Contentful CMS to improve application performance and content management capabilities.
- Worked on DocuSign and Adobe Acrobat services to support digital document generation and electronic signature workflows.
- Provided production support for customer-facing applications by investigating incidents, performing root cause analysis using New Relic, assessing business and technical impact, determining issue severity, and coordinating hotfix releases for critical production defects.
- Partnered with cross-functional teams across Agile ceremonies, sprint planning, feature development, testing, and release activities, contributing to end-to-end delivery in every sprint.

Founder Networking & Collaboration Platform *Oct 2024 – Jan 2025*

- Developed responsive and reusable user interfaces using React.js.
- Created reusable UI components and documented them using Storybook.
- Managed application state using Redux and Redux-Saga for scalable asynchronous workflows.
- Wrote unit and component test cases using Vitest and React Testing Library.
- Collaborated with designers and backend developers to deliver responsive and user-friendly application features.

Logistics Load Matching Platform *Personal Project*

- Designed and built a logistics platform connecting truck owners and load owners, eliminating intermediary dependency.
- Developed REST APIs and backend services using Node.js, Express.js, and MongoDB.
- Implemented user authentication, load posting, vehicle listing, and booking workflows.
- Integrated external APIs for fuel price lookup and vehicle tracking.
- Developed the application using Node.js, Express.js, MongoDB, EJS, Bootstrap, Git, and GitHub.

Awards & Recognition

- Earned **2 Emerging Icon Awards** for consistently delivering high-impact solutions and outstanding performance across multiple client engagements.
- Received the **Collaboration Champion Award** for driving effective cross-functional collaboration and contributing to successful project delivery.
- Honored with the **Customer Success Award** for rapidly adapting to new technologies and delivering high-quality solutions that enhanced customer outcomes.

CERTIFICATIONS

- **Claude Certified Architect - Foundations (CCA-F)** – Anthropic
- **Claude Certified Developer - Foundations (CCDV-F)** – Anthropic
- **Anthropic Academy:** AI Fluency Framework & Foundations, Introduction to Claude Cowork, Model Context Protocol, Claude 101, Claude Code in Action, Claude Code 101, Introduction to Agentic Skills, Introduction to Sub-Agents.
- **AWS:** AWS Certified Cloud Practitioner (Udemy).
- **AI & Developer Productivity:** AI for Developers with GitHub Copilot, Claude, Cursor AI & ChatGPT, GitHub Copilot: The Complete Guide (2025).
- **Software Engineering:** System Design, The Complete Web Development Bootcamp (Udemy).
- **LinkedIn Learning:** Git Essential Training, Next.js Essential Training, React: Using TypeScript, React: Testing and Debugging.
